

GENERATIVE-AI FOR AUTONOMOUS IT OPERATIONS

POWERED BY

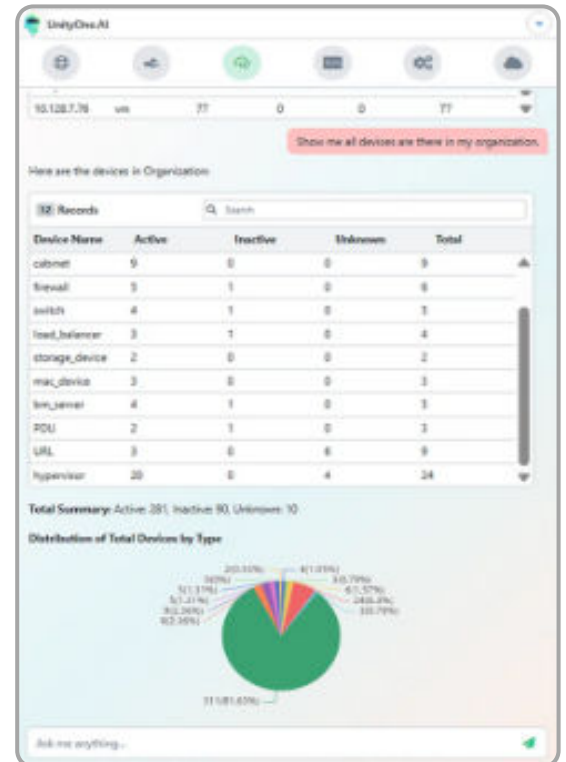

x x x x

INTELLIGENT DCIM WITH GEN AI

Conversational Data Center Intelligence.

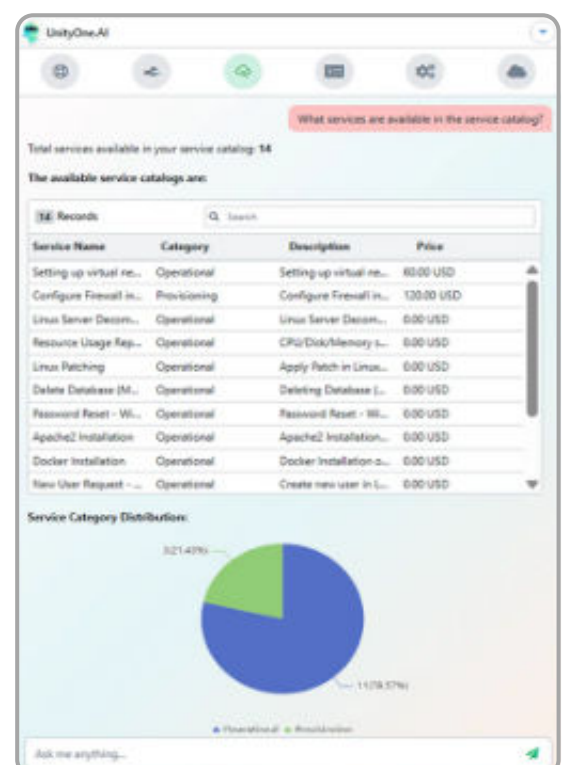

- **Real-time insights** – Ask natural language queries to get real-time insights into racks, power, and cooling.
- **Visualize Instantly** – Auto-generate reports and receive optimization suggestions instantly.
- **Stay Proactive** – Receive real-time alerts and AI-powered recommendations for uptime and efficiency.

HYBRID CLOUD MANAGEMENT (HCMP)

Redefine multicloud visibility with an AI-native assistant.

- **Unified Interface** – Monitor private and public cloud environments in one conversational interface.
- **Stay Proactive** – Real-time alerts and predictive recommendations before failures occur
- **Visualize Instantly** – Auto-generate reports and usage insights with one command

AIOPS MADE CONVERSATIONAL

Turn operational complexity into smart automation.

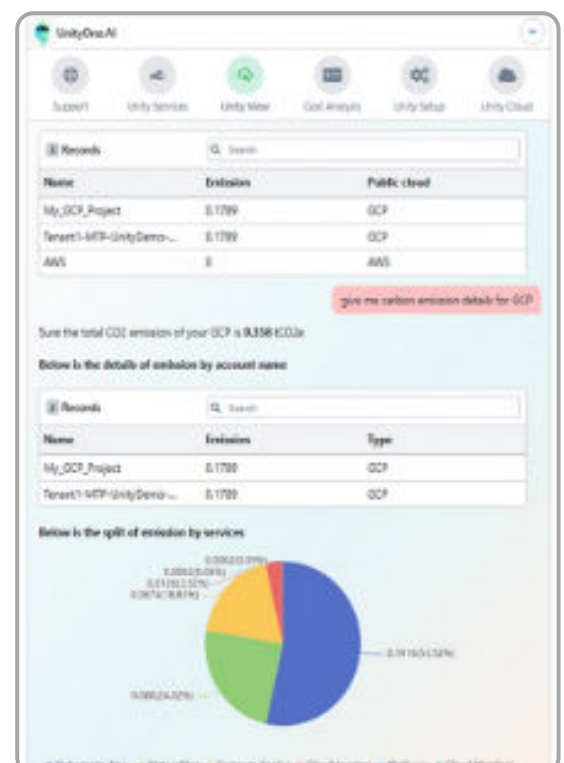

- **Cost Clarity** – Break down cloud costs by provider, region, or service using natural language.
- **Conversational AI** – Visualize trends with graphs and view sudden changes via conversational AI.
- **Trigger Cost-Saving Actions** – Rightsizing, idle termination, off-peak scheduling, region optimization, commitment planning & anomaly detection

SUSTAINABILITY INSIGHTS ENGINE

Meet Your ESG Goals with Gen AI Precision.

- **Track Environmental KPIs** – Analyze carbon footprint, PUE, and energy usage across clouds and data centers.
- **Time-Based Analysis** – Track carbon emissions, energy use, and PUE in real time.
- **Generate ESG Reports** – Use natural language to create sustainability reports instantly

AGENTIC AI BY UNITYONE.AI

Network Agent

Analyze traffic patterns, detect anomalies, and make real-time routing decisions to maintain performance and eliminate manual network tuning.

Security Agent

Monitor, detect, and respond to security threats in real time while enforcing Zero Trust principles across your entire IT environment.

Orchestration Agent

Automate tool coordination, adapt orchestration strategies in real time, and optimize for efficiency through intelligent feedback loops.

Cost Analysis Agent

Continuously analyze spend, detect inefficiencies, and trigger autonomous cost-saving workflows across multicloud and hybrid environments.

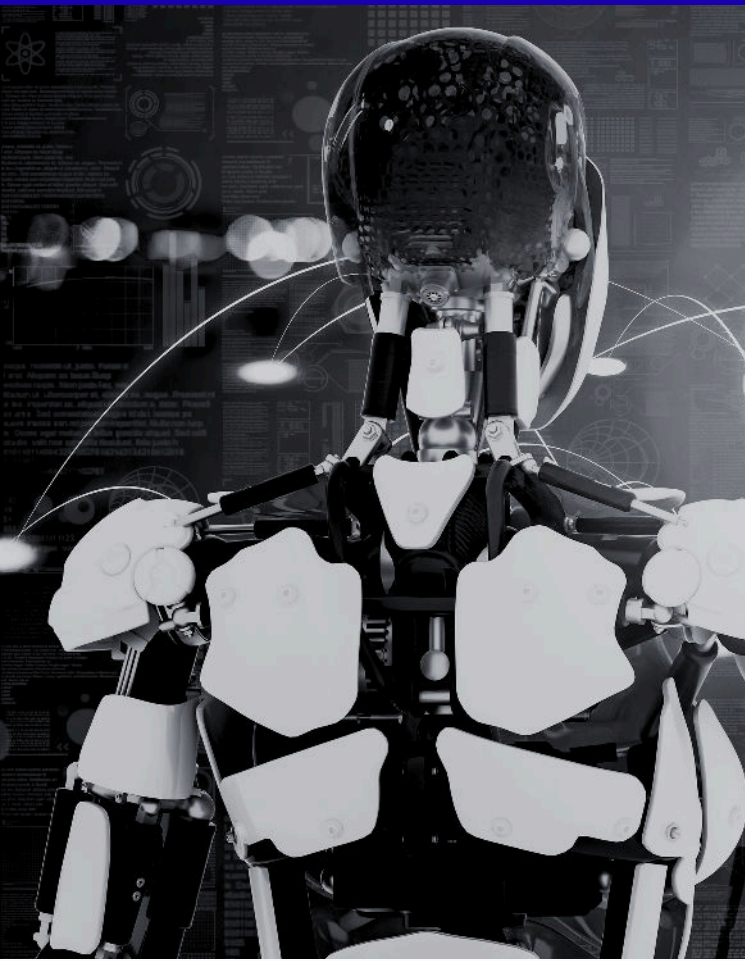

KB Agent (Knowledge Base)

Deliver precise, contextual answers and continuously evolve knowledge across operations, support, and infrastructure teams.

ITSM Agent

Automate ticketing, resolution, and workflows to enhance IT support with real-time context and intelligent recommendations.

Most Comprehensive Cloud Management Solution

UNITYONE.AI is the most comprehensive cloud management solution with Enterprise AI System for every use case that revolves around DCIM, AIOps, HCMP, FinOps, and GreenOps (Sustainability) platforms and more. By integrating these advanced capabilities, it empowers organizations to optimize their global IT operations, by faster decision-making.
